

The Power of We™

IP Office Video Collaboration

Watch productivity and efficiency soar with powerful video solutions for Small and Midsize Businesses

Overview

Video collaboration solutions from Avaya let small and midsize businesses take real-time collaboration to rich and powerful new places. No longer is video exclusively for large enterprises. With Avaya IP Office, our flagship solution for small and midsize business, video is affordable, simple to implement and manage, easy to use, secure and reliable, and available on a wide range of devices - from those in your conference rooms and on desktops to the ones you hold in your hand.

The real-time collaboration you'll experience with IP Office video solutions is truly a revelation - helping enhance productivity and efficiency, accelerate decision-making and manage costs. Interact in more immediate and personalized ways to get more done, faster. Share information with new tools that deepen any collaborative experience.

Choose the option that's right for your budget, IT resources, and collaboration requirements. Get started with built-in solutions for IP Office to see how video can transform your business, add mobility with Avaya Flare® Experience, and move to the RadVision Scopia® solution for the most powerful video collaboration available.

Capabilities

Video built-in - Right out of the box, IP Office delivers simple-to-use, yet powerful video solutions. Two popular IP Office user applications - the Power User and Teleworker solutions - come with HD-quality video softphones included, delivering rich point-to-point video collaboration for up to six people.

On the go, with Avaya Flare®

Experience - IP Office integrates the powerful voice and video collaboration capabilities offered through the Avaya Flare Experience. Included with the IP Office Power User and Office Worker applications, users simply download the free Avaya Flare application to their Apple iPad or Windows-based device, and on-the-go video collaboration is a reality.

Best-in-class Video Collaboration - The RadVision Scopia® solutions extend your options for video collaboration to unprecedented levels. Scopia solutions offer a wide array of hardware and software solutions to suit virtually any need. From soft clients that can be easily downloaded to desktop and mobile devices, to room-based video systems and Multipoint Communications Units (MCU), Scopia delivers sophisticated and flexible video solutions for enterprises of any size.

Benefits

Faster decision-making – Video collaboration helps enhance the way associates connect and interact with each other, anytime and anywhere, making it easier to share ideas and bring products to market.

Better customer service – Virtual face-to-face communication helps small and midsize businesses deliver customer service to a level that easily differentiates you from competitors.

Greater revenue generation – With enhanced collaborative capabilities comes productivity and efficiency improvements that can mean greater revenue generation and a more attractive bottom line.

Reduced costs – Reduced travel to company locations, as well as supplier and customer sites, can quickly achieve a significant ROI, while delivering greater communications and richer interactions.
